Reactive Generators is a Queensland owned company based in Brisbane with an expert team of efficient Generator Technicians made up of Electricians, Mechanics and Engineers dedicated to providing their clients with reliable, safe and efficient Power Generation solutions.

We guarantee you excellence in communication, service and delivery throughout your entire journey with Reactive Generators.

Our team is one of immense talent with a wide variety of skills and capabilities to deliver your project without compromising safety and quality. We are 100% dedicated to continually improving our business to ensure we enhance your experience.

You are invited to come on the journey with us and experience the "Reactive Generators Way!"

Warm Regards,

Hal Little
Electrical Director

Services

Design and Consultation

- Reactive Generators specialises in custom-designed generators, control systems and load transfer systems to suit any requirements. Richly experienced and capable of developing units and systems for various purposes, Reactive Generators offers a comprehensive design and consultation service for all brands of generators and associated systems.

Generator Servicing

- Reactive Generators takes care of all your generator servicing needs. Our staff are leaders in the field of generator servicing and are dedicated to providing reliable and efficient solutions for new and used units. Used by industry like Kennards Hire, Active Hire, PR Power and more as well as maintaining the local government services and branded corporates around Australia, align your assets with the one truly trusted name in power generation maintenance. See your asset productivity rise, downtime lower and maintenance costs drop with preventative maintenance plans structured just for you.

Building Load Transfer and Automatic Transfer Switch Testing

- Reactive Generators offers building load transfer system and automatic transfer switch testing, to ensure your emergency system is dependable and the power is efficiently transferred over short periods of time. Drawing on their abundant experience, our skilled technicians use state-of-the-art equipment and proven testing processes to ensure you're easily able to switch your system to its secondary power during unpredicted power outages.

Generator Repairs

- Reactive Generators has a team of fully qualified experts on hand at all times for all your generator repairs. Our industry-leading professionals have years of experience, ensuring your generator is in the best possible hands.

Services (Continued)

Generator Connections and Disconnections

- Reactive Generators offers comprehensive connection and disconnection services for all types of generators. Whether it's a permanent, temporary, emergency, paralleling, synchronising or mobile plugin, you can count on our experienced and friendly team to get the job done.

Generator Load Testing

- Reactive Generators offers comprehensive generator load testing, personally tailored to suit your needs from 1kW all the way up to 3000kW. Our team of qualified and experienced professionals only use quality equipment, calibrated load banks and proven testing procedures to provide an all-inclusive and guaranteed independent load testing service. We recommend annual testing for most standby/emergency generators and after any low loading situations for prime power generators.

Remote Monitoring

- To ensure your generator is ready to start when needed, regardless of where you are, Reactive Generators offers a complete remote monitoring service. Maintaining online or signalling access to your unit will allow you to monitor and interface with your generator and load transfer system 24/7, without needing to be on-site.

Generator Lifespan Assessment

- To ensure your generator is dependable and will endure the test of time, Reactive Generators offers generator lifespan assessments. This comprehensive evaluation will ensure you can mitigate any potential issues before they arise and or contribute to asset upgrade decisions.

Compliance and Certifications

To ensure you that our word on quality, safety and environment is followed through and delivered, Reactive Generators undergoes regular Safety Audits with Cm3.

Reactive Generators is certified with SAI Global to the widely recognised International Standard: ISO 9001:2015 Quality Management System.

Leading the way in Work Health and Safety (WHS) within our industry, Reactive Generators applies quality and safety standards that have been established to protect our clients, our contractors, our workers and members of the public and to help us achieve our "Go Home Safe" objective.

The philosophy of Reactive Generators is to ensure that our work is undertaken safely, with a high level of integrity and quality.

Reactive Generators are fully insured and members of ISOsafe.
